

N 816 SERIES VACUUM PUMPS

N 816 KNE

N 816 KN.29 DC-B-M

N 816 KN.29 DC-B

ADVANTAGES

- High level of performance in a compact size
- Copes well with vapor and condensation
- High-performing - collecting containers are evacuated quickly and reliably

POSSIBLE AREAS OF USE

- Diagnostics – disposal of sample waste
- Medical technology – especially autoclaves
- Mobile/portable gas measurement technology
- Stationary emission measurement technology (CEMS)

The performance values for the series models shown on this data sheet were determined under test conditions. The actual performance values may differ and depend in particular on the usage conditions and therefore on the specific application, on the parameters of the components involved in the user's system and on any technical modifications carried out which deviate from the standard configuration or the as delivered condition.

If individual designs have been created for specific customers on the basis of series models, other technical performance data may apply. Before operation begins, the relevant operating instructions and/or assembly or installation instructions should be read and the safety information contained in these instructions should be noted. KNF reserves the right to make changes to the product and the associated documentation without prior notice to the customer.
